## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Martinez et al. (U.S. 5,453,090).

Martinez et al discloses the claimed invention in figures 1-5, a retractable sheath (18) disposed around an elongated shaft (12); a stent disposed co-axially between the shaft (12) and the retractable sheath (18); a tubular tapered tip (located at 32) affixed to the retractable sheath (18) having an elongate region (41a-45A) predisposed to fracturing. As to method claims 11-19, as shown in figures 3-5 of Martinez et al device, which clearly capable of performing the method steps as recited in the claimed invention.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Armstrong et al. (U.S. 6,899,727) discloses a disruptable sheath for use around a stent.
